

Optimal functionality
at a reasonable price

#45

Passion driven innovation

Hy5 is a Norwegian medtech company, bringing to market the world's first hydraulic actuated prosthesis. Many years of passion driven innovation have been invested in creating MyHand, a hand prosthesis with optimal functionality - at a reasonable price.

Through highly innovative technology and an effective manufacturing process, the production is made light and cost effective, the functionality is optimized, and the lifecycle longevity is increased.

- Light and cost effective production through 3D printing
- Better function through novel micro hydraulics
- Increased lifecycle longevity
- Optimal grip with MySkin
